D-AIR Air-Suspension Control Unit

Install Guide

Step 0
Prepare for Install

Step 1
ACU Install

Step 2
Sensor Install

Step 3
D-AIR Install

FCC Information to User
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However,there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user isencouraged to try to correct the interference by one of the following measures:
· Reorient or relocate the receiving antenna.
· Increase the separation between the equipment and receiver.
· Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
· Consult the dealer or an experienced radio/TV technician for help.
Caution
Modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Prepare for Install

Step 0 Prepare for Install

Specification

1. Hardware

Parameter	Value	Description	Part Number
Main Power	12V	12V	
Current	Max 10A		
Control Suspension	8 WAY (FBSS)	Supported 4 Each Suspension	
Control Power	12V	Follow a Main Power	
Fuse for Board	Built-In	Default 5A	
Compressor Sensor	Supported	200PSI, 14.06kgf/cm2, 13.8Bar	ACU-SP-802
Compressor Switch	Supported	OFF = N/C ON = 12V (For Relay. Do not direct to load)	
Bluetooth	Built-In	Supported Bluetooth 4.1 BLE	ACU-MB-901
Sensor	4 WAY	0~5V Analog Voltage

Specification

2. Software & Function

| Parameter	Value	Description
Manual Control	FBSS	Up & Down Each Suspension
Memory Control	5EA	1,2,3,4 and Drop
Control Speed	Researching	Split Control S/V Fireware Update Comming Soon
Compressor Switch	Variable	Default ON=110PSI, OFF=150PSI
Hold Level	Supported	Real-time Monitoring Height Level and Automatic Adjust
Refloat	Supported	If under the Drop Memory Height then Adjust Height Level
Anti-Freeze	Supported	Active when Parked
Trigger Function	4EA	ex) Door Lock, Trunc, ACC
Bluetooth Function	Full-Function	All Control and Set Parameter
Android Program	Supported	Download Android App "D-AIR"
Windows Program	Supported	Communication Bluetooth 4.1 BLE
